Procedure to install the parking lot and the areas of standstill on Garmin

The database of the points of interest is constituted by: two files with extension csv Areas of standstill Ania.csv, Parking lot Ania.csv, and two files combined with extension BMP Areas of standstill Ania.bmp, and Parking lot Ania.bmp.

Phase 1 Download the files of the points of interest
Download the zip file of the point of interest.
When it is required, click on Safe to save the file on the computer. Extract the files inside a directory, for instance in desktop or documents.

Phase 2 Connect your device to the PC

Phase 3 Copy the files of the points of interest from the PC to your device
Open the program POILoader, then it will open a mask type wizard, select the directory where you have copied the files Areas of standstill Ania.csv/Parking lot Ania.csv, and Areas of standstill Ania.bmp/ Parking lot Ania.bmp. and continue, at the end the program will return the total one of the parking lot and of the areas of standstill copied.

You can also downlod the program from the web site of Garmin, selecting download or link .....

Phase 4 Check on Garmin the correct loading of the Parking lot and the Areas of standstill
To check if the parking lot and the areas of stanstill have correctly been loaded it is enough to verify on own **Garmin** the existence of the category **"Areas of standstill Ania and Parking lot Ania"** with the relative **icon**.
The run to be followed on the Garmin to visualize the categories of the points of interest (Areas of standstill Ania/Parking lot Ania) is following: Where do I go? My positions Point of interest personalized.
